AWESOME PEOPLE TRUST US

IXON is a real human adventure, and we are proud to take stock of the progress made. We started out 25 years ago in France with a blank sheet of paper. Today, we are a worldwide brand distributed in over 70 countries, as well as an international group, including 7 companies and 500 co-workers.

Despite the current difficult health situation, we have continued to see very positive growth. We are pursuing our "Think Global, Act Local" approach, consisting in providing the same level of excellence all over the world, but adapting our working methods and our product range to the specific needs of our users in each country.

Our mission consists in supplying the very best equipment to our customers. The two driving forces behind our product development are innovation and technology. Thanks to this approach, we help boost our riders' performances in competition, while improving the riding experience of motorcyclists who choose IXON equipment on the road. It is very simple: what we learn in the heat of racing, we try to reflect in our product ranges!

On the racing scene, 2021 was notably marked by the incredible World Championship victory of our rider Remy Gardner in Moto2. This win in an intermediary category, just a few years after our rider Brad Binder's victory in the Moto3 category in 2016, shows our real commitment to Grand Prix racing.

In this MotoGP championship, representing the summit of motorcycle racing, our brand is recognised for its added value and its increasingly significant impact. For the 2022 Grand Prix season, we have 5 riders in the MotoGP category and will be supplying teamwear to 5 MotoGP teams.

A new range of products linked to the world of competition will be available, with tie-in merchandising on offer from several different teams and riders through our official licences. The new range, a logical follow-up on our investment in Grand Prix racing, is a chance for all our customers and racing fans to access replica products worn by the teams and riders.

This new range will feature in a product catalogue that is more and more complete. Since our brand was set up, we have been grateful for the positive feedback and enthusiasm around our collections. We have put all our passion and skill into each range in the IXON catalogue, so that every rider can find the equipment they need, whatever their style, body shape and budget. The diversity of our products means that today our users can make IXON equipment their own, exactly as they wish. This goal cherished by our brand is directly expressed in our motto and even on our products: #RIDEYOURWAY!

We never forget that the quality of our distribution network brings our products into the spotlight, supporting and dynamising them. We would like to warmly thank you all for your commitment and professionalism. You are the pillars of our solid distribution process.

We are delighted to present our spring-summer 2022 collection. Together, let's continue to make the best possible contribution to our shared love of motorcycling!

Thierry Maniguet, Founder and President of IXON

MADE IN **FRANCE**

IXON may now be a global brand sold in over 70 countries but we've stayed true to our roots: our head office is still in Mâcon in France.

We are proud to have **100% French expertise** at our premises. Our Mâcon HQ is home to the IX-LAB and SOS REPAIR SERVICE, two workshops specialising in making, updating and repairing leather suits.

IX-LAB

The IX-LAB is our innovation and production laboratory at the French IXON HQ in Mâcon: **this is where we make all our bespoke suits for our professional riders.** It's precise and highly technical work. The suits are tailored to each racer's body shape as well as their personal preferences and requirements over the course of the racing calendar. That means every suit the IX-LAB teams make is made on request as a one-off: each suit is a unique piece.

The IX-LAB uses its expertise, organisation and versatility to keep the suits up to date: modifications, adjustments and repairs are provided throughout the season with very short turnarounds to give riders the best possible service.

As well as producing bespoke suits, the IX-LAB also works as a design office for IXON's R&D department to take care of research and tests in both leather and fabric. The IX-LAB collaborates with both the R&D department based in Italy, focusing on innovations in racing, and the R&D department based at IXON's HQ in France, in charge of innovations for the collections.

SOS REPAIR SERVICE

As well as the IX-LAB for professional riders, the SOS REPAIR SERVICE is our second workshop based at IXON's head office in France. It **provides support to any leather race suit owner**, whether they're professionals or amateurs and **no matter the suit brand.**

Our SOS REPAIR SERVICE's unique expertise enables it to provide three types of service:

- Customisation and branding
- Alterations and adjustments
- Repairs and reconditioning

You can call or email the SOS REPAIR SERVICE:

IMPERMEABILITY AND BREATHABILITY

TECHNOLOGY DESIGNED FOR COMFORT

X DRY

Impermeability is the capacity of a fabric to **resist water pressure**.

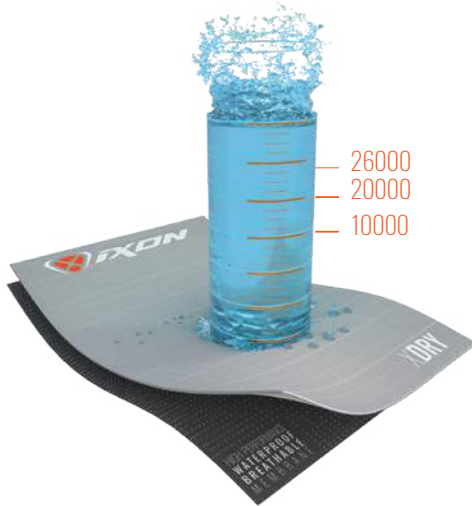

Breathability is the capacity of a fabric to **eliminate water vapour**, especially the rider's sweat (due to heat or stress in particular). When you ride a motorbike, water from outside (rain or spray, for example) and the rider's sweat are problems because feeling wet is soon uncomfortable.

IXON equipment is both **impermeable and breathable**: it can **protect you from water, while eliminating sweat** to maintain riding comfort.

The impermeability and breathability of a fabric can be measured.

We use the **Schmerber water column** test to measure impermeability performance and the **MVTR** index to test breathability.

IMPERMEABILITY PERFORMANCE: SCHMERBER WATER COLUMN TEST

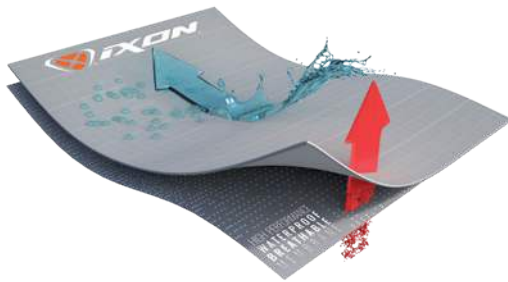

The Schmerber water column test shows a fabric's level of impermeability, expressed in Schmerbers (named after Charles-Edouard Schmerber, the creator of the test). During the test, the clothing fabric undergoes pressure from a water column. One millimetre of a water column is equal to 1 Schmerber and 0.1 mbar of pressure. The test ends when the water starts to penetrate the garment. We can then measure the water pressure the garment was able to withstand. The number of millimetres in the water column is given in Schmerbers (ISO norm). It shows the impermeability performance of the fabric. The higher the number, the more impermeable the fabric is. Because of the pressure on motorcycling equipment resulting from wind or speed during a ride, motorcycling equipment must achieve specific levels of performance which greatly differ from the standards for everyday clothing. The ISO norm states that a fabric is waterproof from 1300 mm / 1300 Schmerber. To give you an idea, rain rarely goes over the equivalent of 2000 Schmerber. But for a motorbike riding in the rain at 130 km/h, the pressure from the water on clothes can reach about 8000 Schmerber.

M V T R
MOISTURE VAPOUR
TRANSMISSION RATE

BREATHABILITY PERFORMANCE: THE MVTR INDEX

The MVTR index tests a fabric's breathability rate. MVTR stands for "Moisture Vapour Transmission Rate". It measures the quantity of water vapour in grams that a square metre of material lets through in 24 hours. The result is given as g/m²/24 hours and shows the fabric's breathability performance: the higher the result, the more breathable the fabric.

XDRY

XDRY: HIGH-PERFORMANCE MEMBRANE DEVELOPED BY IXON

For the most demanding users of motorcycling equipment, we have developed a high-performance membrane which is both waterproof over time and highly breathable: XDRY. Our XDRY membrane, with its high technical standards, contains microscopic pores that cannot be seen by the naked eye. They are small enough to prevent rain from getting through but big enough to eliminate sweat. The XDRY membrane is an IXON product in fixed or removeable versions.

		IMPERMEABILITY	BREATHABILITY
XDRY	XDRY 26-30	26 000	20 000
	XDRY 20-10	20 000	10 000
	XDRY 14-20	14 000	20 000
DryMesh		10 000	5 000
		5 000	5 000
		3 000	2 000

IMPERMEABILITY AND BREATHABILITY ON OFFER IN IXON CLOTHING

IXON clothing includes 2 ranges of waterproofing, XDRY and DryMesh. Each range has 3 performance levels.

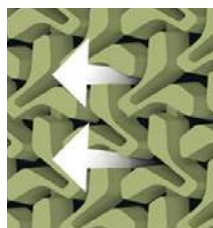

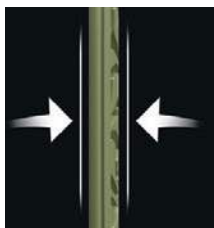

FANOM® TECHNOLOGY A REVOLUTION IN PROTECTION

SMART DESIGNED INJECTED STRUCTURE FOR MAXIMUM COMFORT

fanom® SEK TypeA is a protection for the shoulders, elbows and knees, with Level 1 CE certification.
fanom® Hip TypeB is a hip protection with Level 1 CE certification.

fanom® technology has revolutionised protection through a smart-designed injected structure providing riders with a **maximum level of comfort**:

- The structure can stretch in two directions, helping to make the product more flexible and extensible. So fanom® protections are adapted to all body shapes and guarantee total freedom of movement.
- The ultra-light and ultra-slender structure also helps to make fanom® protections practically invisible under motorcycling clothes. Riders will almost forget they are wearing them.
- Lastly, with its open cell design, the fanom® protection structure provides optimum ventilation.

ULTRA-FLEXIBLE
ULTRA-LIGHTWEIGHT & SLENDER
ULTRA-VENTILATED

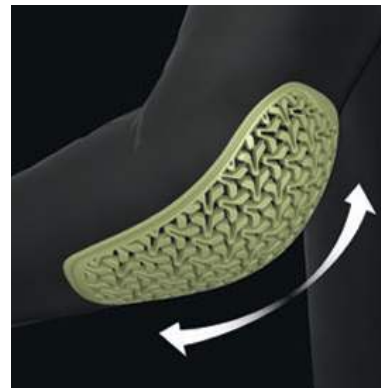

Fanom®

MADE IN ITALY

FIT and FORGET

Flexible and extensible in two directions
to **adapt to all body shapes** and
give **total freedom of movement**

The additional T+/T- certification guarantees that fanom®
protection will stay in shape, both summer and winter:
flexibility and absorption of impacts are the same whatever
the outdoor temperatures (+40°C /-10°C).

EN 1621-1:2012

THE EN 17092 NORM FOR MOTORCYCLE CLOTHING

EN 17092 is the latest certification standard for motorcycling clothes. It is used to certify all motorcycling clothing, whether it is designed for professional or leisure use. Standard EN 17092 consists of **5 certification classes**, corresponding to 5 levels of tests, with specific levels of protection for **3 zones at risk**.

The 5 certification classes adapted to the different types of motorcycling are AAA, AA, A, B and C:

- Class AAA/AA/A clothing = protection against abrasion, impacts, ripping, tearing at the seams + guaranteed safety and ergonomics.
- Class B clothing = protection equivalent to class A clothing, with the exception of impact absorption, since class B products do not include protection against impacts.
- Class C clothes = specialised clothes designed only to keep one or more protections against impacts in place, either for outer clothing (the letters "C/O" meaning "C over") or for underclothing (the letters "C/U" meaning "C under").

THE 3 RISK ZONES

The 3 risk zones correspond to different levels of risk of injury, depending on the parts of the body impacted after a fall:

- Zone 1: highest level risk of injury
- Zone 2: moderate risk of injury
- Zone 3: lowest risk of injury

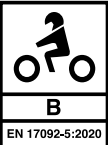

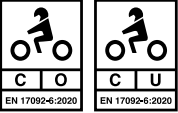

THE DIFFERENT NORMS FOR MOTORCYCLING EQUIPMENT

Motorcycling equipment manufacturers follow the CE certification through the norms drawn up by the European Committee for Standardisation (ECS). The norms are listed with numbers and the letters "EN" (European Norm) before the number.

There are different norms for the various categories of products in the IXON range:

- Clothes: EN 17092
- Gloves: EN 13594
- Shoes: EN 13634
- Protections: EN 1621-1 (shoulder, elbow and knee protection), EN 1621-2 (back protection)

5 CERTIFICATION CLASSES

CLASS AND STANDARD	DESCRIPTION	EXAMPLES OF IXON RANGES AND IXON PRODUCTS	LABEL
AAA EN 17092-2	Level of protection adapted to use on the track Clothes made with fabric and features meeting the highest standards, above the levels required for products in class AA and class A	RACING: leather suits, leather jackets, leather trousers	
AA EN 17092-3	Level of protection adapted to use on the road Clothes made with fabric and features meeting lower standards than for products in class AAA and higher standards than for products in class A	ROADSTER: premium textile jackets ADVENTURE: jackets, trousers URBAN: premium textile jackets HERITAGE: premium leather and textile jackets DENIM: premium denim clothing	
A EN 17092-4	Level of protection adapted to use in the city Clothes made with fabric and features meeting lower standards than for products in class AAA and class AA	ROADSTER: textile jackets, textile trousers URBAN: textile jackets HERITAGE: leather and textile jackets DENIM: denim clothing	
B EN 17092-5	Clothes with protection equivalent to class A clothes, excepting for absorbing impacts, since class B products do not include protections against impacts		
C (C/O ET C/U) EN 17092-6	Clothing specially designed to keep one or more protections in place against impacts, either as overclothing (C/O) or as underclothing (C/U).		

- The letters "CE" stand for "Conformité Européenne" (French for "European Conformity").
- The main regulatory authority for CE certification is the European Commission.
- The CE label is given to products sold in the European Economic Area (EEA) which have been assessed to meet high standards in terms of safety, health and protection of the environment, in compliance with the European Commission and the corresponding norm. The CE label is also shown on products sold outside the EEA, but which are made in the EEA and originally created to be sold in the EEA.

The Racing range includes technically sophisticated items, brilliantly combining protection and comfort: our Racing gear will help boost your quest for performance on the race track. The leather suits in our range are worn by a whole host of national championship riders in the Speed, Endurance and Supermoto categories. With our 2-piece suits, you can even transfer the race-track spirit to your daily rides. Do you want to beat your records on the track or improve your rides on the road with high-quality products? Then IXON Racing is for you!

VENDETTA EVO

INSPIRED FROM MOTOGP™

Make the switch to performance mode!

With a unique and dynamic design, optimised for ventilation and freedom of movement, this suit will ensure you a powerful and comfortable driving experience. The Vendetta Evo model, instantly recognisable by its ultra-preformed lines, comes equipped with laminated flexible and resistant materials, in areas likely to experience abrasion – offering you an unparalleled level of innovation and performance. Embodying Ixon's daring and renewed success, the Vendetta Evo suit owes its avant-garde design to MotoGP™. You're guaranteed to discover new driving sensations and enjoy a remarkable experience on the track.

Designed in [France](#)

SAFETY

- Securized stitching • Thick and supple cow leather • High abrasion resistance synthetic fabric reinforcements on exposed areas : forearms and knees • Compatible with IX-AIRBAG U03 vest • Reinforcements with material complexing on areas exposed in case of fall (double layer of leather, 3D AIR SPACER mesh) for safety and better airflow (chest, biceps, triceps, shoulders, thighs) • 2-layers of leather on buttocks and foam reinforcements on coccyx area • Localized micro-perforations to avoid weakening the leather on stitching areas • Thumb loop straps (which prevent the sleeve from coming up in case of a fall)

AIRFLOW

- Micro perforated leather • Air extractors on hump and back • Removable mesh lining • Multi-material reinforcement (double layer of leather and 3D AIR-SPACER mesh) for safety and better air flow (chest, Biceps, Triceps, Shoulder, Thighs) • Pockets for protectors in 3D AIR-SPACER mesh

SPECS

- MotoGP™ inspired dual-density sleek shells on shoulders and knees • Flex leather on sides, on back of armholes and on bottom back • Stretch inside sleeves and on all the leg length, from crotch to calves grip inside knees • Aerodynamic hump equipped to welcome a water bladder • Removable and adjustable elbow sliders • Knee sliders included, adjustable and replaceable (ref. Slider race 2.0) • 2 internal pockets

VORTEX 2

102 20 1 011

Balanced and stylish, you won't be disappointed!

This racing suit is designed to provide an optimal experience and performance on the circuit, in complete safety: cut very close to the body and ultra-preformed, the suit is nonetheless made incredibly comfortable thanks to cleverly placed flex and stretch, while the shoulder protectors and the aerodynamic hump on the back are both streamlined and integrated. Compatible with our IX Airbag U03 vest, you'll find it on circuits across France, and further afield!

1080

SPECS

- Racing collar with neoprene back and high neckroll
- Stretch reinforced with aramid fibers
- Securized stitching
- Flex leather on back of armholes, bottom back and over the knee
- External integrated sleek shells on shoulders
- Sliders on elbows
- Aerodynamic hump, empty and perforated with space and passage for a water bag
- Zipped cuffs with strap
- Zipped calves
- Knee sliders included, adjustable and replaceable (ref. Slider race 2.0)

JACKAL

LATEST GENERATION RACING SUIT

An undeniably sporty design and a unique experience of comfort!

Cutting edge and equipped with advanced materials, the Jackal offers you a new vision of performance. Inspired by the innovations that have forged Ixon's competitive history, this piece forms part of a new generation of suits – with athletic and modern lines. Nothing is left to chance: profiled rubber on the shoulders, ventilated aerodynamic hump, knee sliders, and a selection of optional accessories. Dedicated to your driving experience, the Jackal combines comfort, technology and robustness, allowing you to ride in complete safety. Whether you ride for pleasure or for performance, it's guaranteed to keep all its promises.

RAGNAR

A design tailored for the most beautiful of adventures

Spearheading the new generation of Ixon Adventure products, the Ragnar set leaves nothing to chance in terms of both safety and technology. With a muscular design and reinforced Adventure character, this 3-in-1, ultra-efficient set offers you the choice of riding either hyper-ventilated or totally protected against the most extreme conditions. Waterproof and breathable, Ragnar is equipped with an X-Dry 26/20 insert (developed by Ixon) which largely measures up to some of the most popular membranes on the market. Discover the most radical of Ixon Adventure products!

HIGH-PERFORMANCE MEMBRANE THAT COMBINES A STRONG RESISTANCE TO WATER PENETRATION AND THE ABILITY TO EVACUATE EFFICIENTLY BODY MOIST

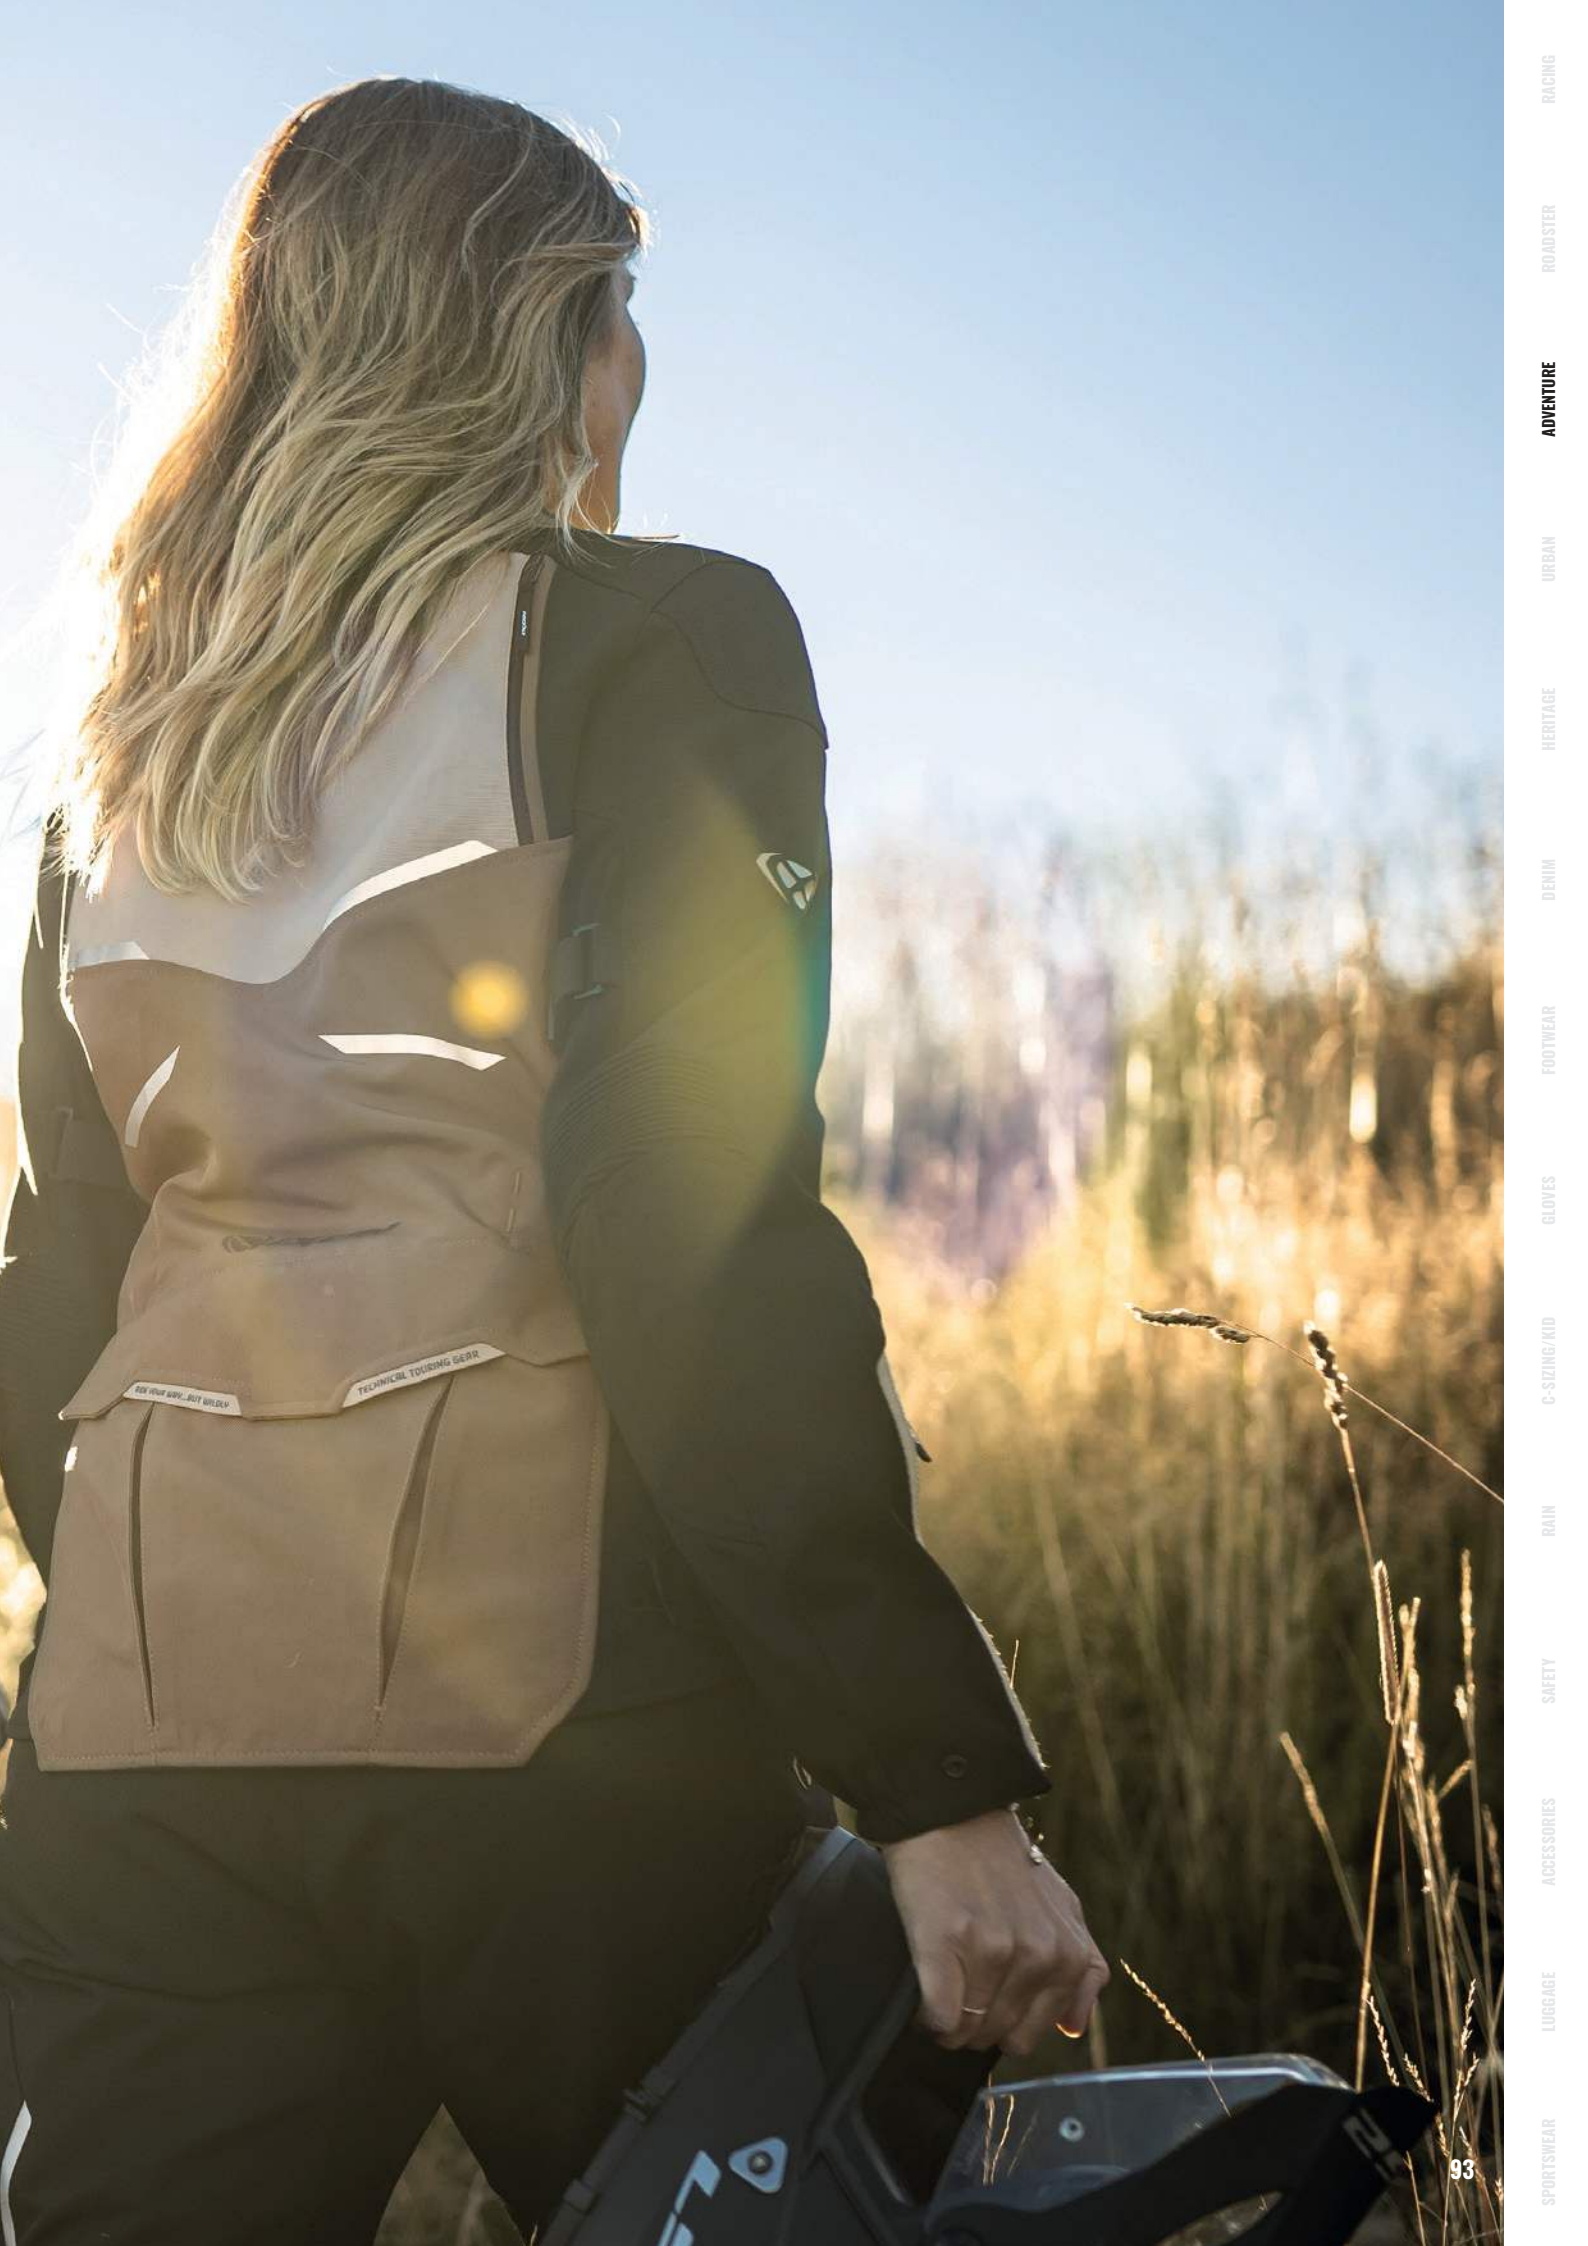

EDDAS

Designed to stay the distance

A real gem of comfort and technology, the EDDAS set turns every one of your trips into a special moment. Developed, designed and created by and for adventurers, this model meets all the needs of even the most extreme road trips. Waterproofing and breathability are ensured in order to face up to the harshest of climates, thanks to the X-Dry 20/10 insert (developed by Ixon): guaranteed to keep you dry whatever the conditions, as well as offering thermal protection with some of the warmest removable inserts in the range.

Designed in  France

EDDAS

A WEALTH OF FUNCTIONNALITIES

Innovative, right down to the last detail

With this iconic touring look offered in five stylish and modern colours for both men and women, you won't be able to resist! Beyond its appearance, however, Eddas is designed with some fantastic innovations that will allow you to experience incredible adventures.

COMPLETING YOUR ADVENTURE OUTFIT

What's on your horizon? What are the upcoming chapters you will be writing at the handlebars of your motorbike? To help you enjoy your riding experience to the full, here is the equipment you need to match the jackets and trousers in our Adventure range!

DIRT AIR

BREATHABLE AND FLEXIBLE SUMMER GLOVE

The DIRT AIR is the summer glove for adventure-lovers. This glove with a short cuff provides maximum breathability thanks to 3D Mesh material and remarkable flexibility with the Amara fabric palm. The DIRT AIR is a compact glove ready to hit the road and cutting no corners on protection, since it includes a flexible and invisible knuckle shell, as well as padding at the palms and edges.

1001

1060

1103

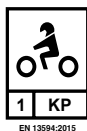

1133

MS LOKI

MID-SEASON GLOVE IDEAL FOR GETTING AWAY FROM IT ALL

The MS LOKI is a mid-season glove, the ideal partner for all your best rides. The mid-length cuff on the gloves aims to provide protection, user-friendliness and comfort. The MS LOKI combines Ripstop and leather, a flexible slider and padding on the palms and edges. It stands out thanks to the XFIT concept, a construction with a laminated insert for optimum grip. Elements including flex leather on the knuckles and ingenious details such as the scraper for the visor on the index finger, as well as loops on the palm side to make them easier to put on all show the high standards in these adventure-ready gloves.

1103

1127

1128

KASSIUS

SHOES WITH TECHNICAL FEATURES TO HELP YOU PUSH YOUR LIMITS

Once you are equipped with KASSIUS, the only limits to your adventure will be your own. These shoes/boots are a new reference in technology to enhance your riding experience. KASSIUS, with level 2 CE certification, stands out through the extensive padding at the toes, heels and sole, along with officially certified ankle protection. A perfect fit and comfort guaranteed thanks to the protected opening/closing system using the ATOP ratchet with a metal cable, the large central zip protected by a flap, the tab adapting to your body shape with neoprene, and loops making the shoes easier to put on. KASSIUS is waterproof and breathable, ready for all conditions and all terrain. In short, this highly technical shoe will satisfy your thirst for adventure to perfection!

SIZING CHART

See p.322

OUR OFFER IS

HI-TECH

Our entire range is **CE**-certified.

All our models are designed for motorcycles and include specific features such as easy access to knee protectors, adjustable positions and no metal buttons or rivets in areas that may come into contact with the fuel tank.

We have also chosen premium materials to provide the best quality:

DuPont™ Kevlar® fibers

Lightweight fibers whose tear, puncture, stretch and heat resistance set the benchmark in countless industrial sectors.

CORDURA® Denim

Cloth that is four times stronger than 100% cotton denim, provides good resistance to tear and abrasion but is lightweight, comfortable and soft.

COOLMAX®

Breathable technology for improved heat reduction and moisture wicking with quick drying and anti-odour features.

COMFORTABLE

This is an essential feature for us. Our jeans are all stretch and contain elastane.

We use specific stitching on the waist to keep the fabric stretchy in this key area.

The fits are designed especially for racing comfort. The waistbands sit a little higher on the back to cover the lower back and several of our models have preformed legs.

VERSATILE

We provide 2 builds so you can choose the right IXON jeans for you:

The main fabric fulfils all the certification's criteria so it doesn't require internal reinforcements. The 1-layer jeans are light and breathable, making them the perfect choice for warm weather conditions.

The jeans are partly or fully lined which provides improved protection in the most exposed areas and means the external cloth can be light and soft. The 2-layer jeans are the best choice for riding in any weather.

STRETCH MAX

MATERIAL
DEVELOPED
BY IXON
FOR OPTIMUM
GRIP

The **Stretch Max** fabric strikes the perfect balance between **resistance, comfort, breathability and lightness**. This is an innovative and ultra-technical fibre developed by IXON, combining **cotton, Cordura® and elastane** in ideal degrees to meet all your motorcycling needs. Designed for riding, made to last.

The Stretch Max fabric provides:

- **Protection** - Cordura®, a material with a tried and tested reputation, provides excellent resistance to tearing, scratching and abrasion.
- **Comfort** - Spandex fabric follows your riding position while adapting to the rider's body shape.
- **Breathable and light** - With a single-layer construction requiring no inner padding, Stretch Max helps eliminate water vapour and is incredibly light in weight.

FIT and FORGET

fanom® technology a **revolution in protection**
thanks to a smart designed injected structure
for maximum comfort

C-SIZING

We have designed a specific "C-sizing" range for motor cyclists on the larger side, as well as a specific range for children.

C-sizing stands for "Comfort-sizing": C-sizing provides ease and comfort around the tummy, hips and waist, but with standard lengths for the arms and legs.

C-sizing sizes range from C-2XL to C-8XL (see size guide p. 318).

ULTRA BREATHABLE AND VENTILATED CHILDREN'S ROADSTER GLOVE

- Outer materials: Mesh (back), Amara (palm)
- Protections and shell: supple and invisible knuckle shell, reinforced palm
- Ventilation: ultra-breathable glove due to Mesh on the back
- Cuff: short (neoprene material)
- Fastening: tightening tab at wrist

R A _ I N

You'll always be ready to face up to bad weather! With our dedicated equipment, you can keep your body dry when you are riding, despite the rain.

RAIN

MADDEN	277
SENTINEL	277
SUTHERLAND	277
DOORN	277
YOSEMITE	278
STRIPE JKT	279

COMPACT LADY	280
COMPACT L PANT	280
COMPACT SUIT	281

IMPERMEABILITY AND BREATHABILITY:

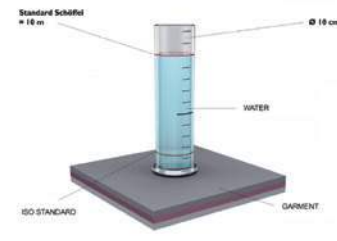

As a reminder (see page 8-9 for more details), impermeability is the capacity of a fabric to resist water penetration, and breathability is the capacity of a fabric to eliminate water vapour and the rider's sweat. Impermeability performance is measured by the Scherber water column test, with 1 mm of water column equal to 1 Scherber. Breathability performance is measured by the MVTR index (Moisture Vapour Transmission Rate).

At IXON we have 2 ranges of rain equipment: the Road Series range features equipment providing top-level performance in bad weather, while the Compact Series corresponds to practical, light and compressible products.

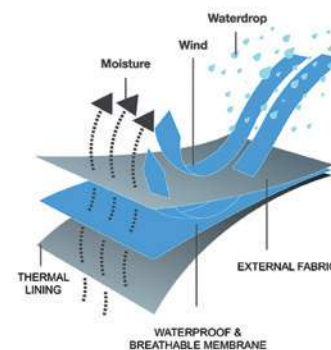

Here are the impermeability and waterproof performances for IXON rain equipment:

	IMPERMEABILITY	BREATHABILITY
	10000 	3000
	3000 	0

How can we measure the impermeability performance of IXON rain equipment in the different types of bad weather you encounter when out riding? Here is the link between the examples of rain intensity, the equivalence of mm measurements and Scherber, as well as the 2 corresponding types of IXON rain gear:

RAIN INTENSITY	EQUIVALENT MM/SCHMERBER	RANGE
AVERAGE RAIN	1300 mm	
2 HOURS OF RAIN	3000 mm	
3 HOURS OF RAIN STORM	5000 mm	
4 HOURS OF RAIN STORM	10000 mm

A photograph of a motorcycle rider on a scenic road. The rider is wearing a black jacket and a black glove, and is holding the handlebars. The road is paved and has white dashed lines. To the left of the road is a large, dark, rocky cliff face. To the right of the road is a field of yellow and pink flowers. The background is a clear blue sky. The overall scene is bright and colorful.

#RIDEYOURWAY

The image shows a close-up of several layers of technical fabric. The top layer is a light-colored, ribbed knit fabric. Below it is a dark, textured material with a repeating pattern of raised, rounded rectangular shapes. The bottom layer is a light-colored, woven fabric with a distinct herringbone or twill pattern. A semi-transparent white rectangular box is overlaid on the left side of the image, containing the text 'TECHNICAL INFORMATION' and a small horizontal line below it.

SIZING CHART

BUILD

To see approximately which size of IXON equipment you should choose depending on your weight, please see the table below:

MEASUREMENTS

To see which size will suit you, take the measurements shown below.

A CHEST SIZE

Place your tape measure around the widest part of your chest and breathe normally.

B WAIST SIZE

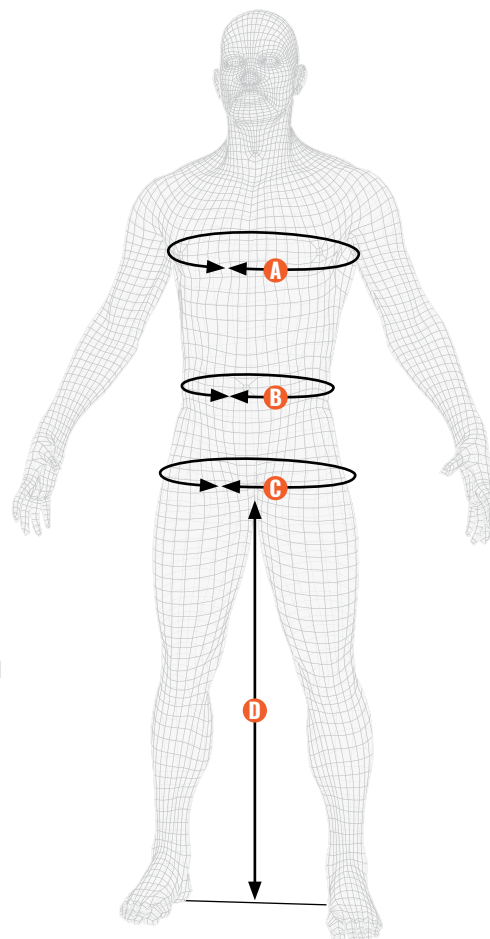

Place your tape measure just below your bottom ribs around your stomach.

C HIP SIZE

Place your tape measure around the widest part of your hips and buttocks.

D INSEAM

Stand up with your legs straight and measure from the crotch to the floor.

CHOOSE YOUR SIZE

Compare your measurements to the charts. If your measurements produce different sizes, choose the next size up to cover all measurements.

Example for a men's jacket:

A = 99cm: L

B = 87cm: L

C = 103cm: XL

So XL is the right choice
