# HARD BAGS

## MONOLOCK®

In order to offer a wider range of applications and uses, GIVI has introduced MonoLock®. Following the same philosophy that defines the Monokey® fitting system; this second solution is mostly made for lighter vehicles, such as scooters and maxi-scooters. Even with limitations of maximum load, this system of fitting combines performances comparable to those of the Monokey® system with components boasting lighter and far smaller dimensional restrictions. Because of its natural compatibility with different kinds of motorcycles, it is appreciated by the most important brands of motorcycle producers, who have adopted it for their original accessories. As well as for Monokey®, the opening of the case top shell and the detachment of the case from the plate are operated with one key only.

## MONOKEY®

Monokey®, patented by GIVI, is the most widespread fitting system for hard cases and side cases. Simple to use, it allows operation with only one key both the opening of the case top and the detachment of the case from the fitting plate. All the Monokey® products combine the best characteristics of mechanical resistance and rigidity of the fitting, with features using compact and light components. The even distribution of the load on the plate surface is guaranteed by the three fitting points. The damping of oscillating and vibration and the contact between the bottom shell and the plate are assured by four spacers made of elastic material, which is particularly resistant to extreme weather and temperature variation. Thanks to these solutions a high level of reliability of the fitting is guaranteed.

## FIXED SYSTEM

Underbone street bike is the most common motorcycle type widely used in many Asian cities. Basic, yet slim rack system mounted on the motorcycle - great for everyday ride in heavy traffic congestion. Its compact locking and racking system combination - better fit the size and weight of the underbone street bike.

**G10****G10N****INFO****DESCRIPTION****G10N** | 10ltr. Fixed System® Center Case Black

A person wearing a bright yellow raincoat and a black helmet with a clear visor stands next to a dark-colored motorcycle. The motorcycle is covered in water droplets, suggesting it has been in the rain. Two black Givi saddlebags are mounted on the seat. The background shows a blurred urban scene with a bridge and buildings under a cloudy sky.

HELMET

## OFF ROAD

Off-road helmet has clearly elongated chin and visor portions, a chin bar, and partially open face to give the rider extra protection while wearing goggles and to allow the unhindered flow of air during the physical exertion typical of this type of riding. The visor allows the rider to dip his or her head and provide further protection from flying debris during off road riding. It also serves the obvious purpose of shielding the wearer's eyes from the sun.

## MODULAR

The latest generation of helmets by GIVI, often with double homologation and configured to convert from a Full-Face to a Jet helmet courtesy of the removable chin-guard. Incorporated within the Modular range is the classic opening style of helmet which nowadays is the preferred choice for many motorcycles, due to the chin-guard which can be lifted, providing an easier and faster fit. GIVI was the pioneer of this articulated category of helmet, being the first company to introduce models with truly unique features. The prominence of the GIVI brand within this particular product range is reflected by the extensive range featured in the catalogue.

## DEMI JET

Compare to the homologated Jet model, it differs from the latter with less shell surface area, shorter in the neck and cheek parts, it's often preferred by female users for its lightness, functionality and practicality. Its use is recommended only for short journeys and exclusively in urban areas.
