

2023 ASIA SPRING / SUMMER COLLECTION

2023

IXON is a brand of motorcycling equipment created by and for motorcyclists. The company was founded in 1996 in France by Thierry Maniguet, a big fan of motorcycling. Today it is an international brand distributed in over 70 countries. But it has stayed close to its roots. Thierry Maniguet is still at the head of IXON, and our headquarters are still in France, in Mâcon.

YOUR RIDING EXPERIENCE IS OUR PRIORITY

We are convinced that along with the importance of your motorbike and the environment all around you, the equipment you use helps to shape your riding experience. At IXON, we have a committed approach: we want to play our part in your riding experience. To make sure you enjoy the best possible experience at the handlebars of your machine, we strive to provide you with the very best equipment. Since the brand's beginnings in 1996, this is our mission.

FROM OUR RIDERS TO YOU, INNOVATION AND TECHNOLOGY ARE THE TWO DRIVING FORCES IN DEVELOPING OUR EQUIPMENT

Our aim is to reflect everything we learn in the heat of competition in the products you wear. To achieve that, the two driving forces behind our product development are innovation and technology. By using motorcycle sport as our main avenue for research and experiment, we develop innovations and technologies with our riders, and then adapt the products to our collections for you.

#RIDEYOURWAY!

DESIGNED IN FRANCE

OUR HERITAGE COMES FROM FRANCE, BUT SO DOES MUCH OF OUR EXPERTISE: OUR PRODUCTS ARE DESIGNED IN FRANCE.

France is known throughout the world for its style and clothes culture, and it's in France, at the IXON headquarters in Mâcon, that our products are born from the hands of our designers and our R&D team.

IXON products are indeed developed at the brand's headquarters by our team of designers, all fans of motorbikes and clothes. Their aim is to create a link between the two worlds with a real guarantee to the user.

OUR DESIGN SKILLS AT IXON ARE EXPRESSED IN PRODUCTS THAT:

- Are thought out in detail, i.e are adapted to the user's specific activity and feature a high level of comfort while respecting fashion and trends;
- Include all the features required;
- Demonstrate a high level of manufacturing quality.

In other words, the Designed in France approach at IXON means combining creativity, utility and high standards.

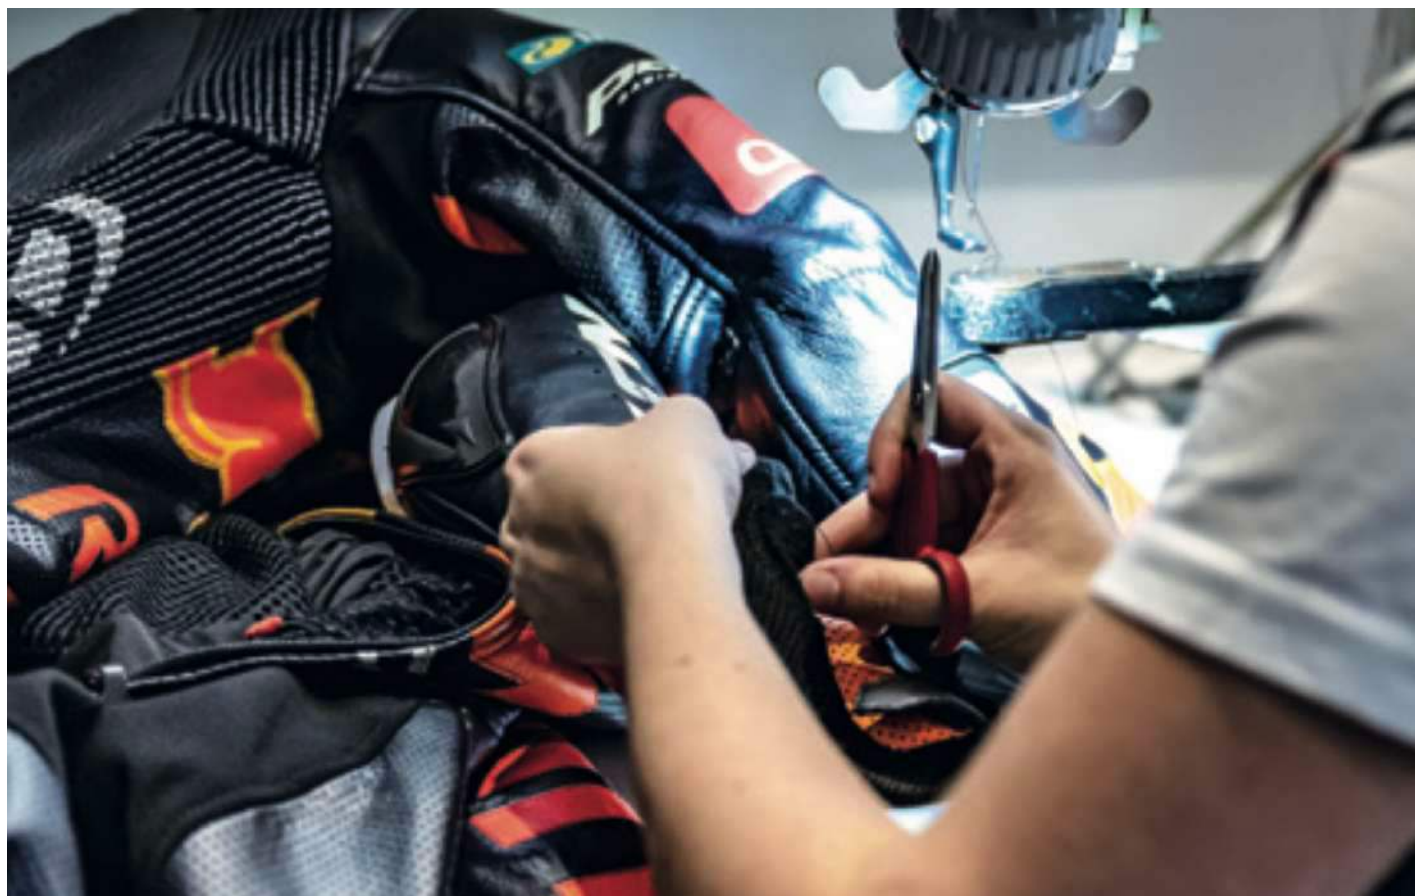

WE ARE PROUD TO HAVE 100% FRENCH EXPERTISE AT OUR HEAD OFFICE IN MÂCON. OUR MÂCON HQ IS HOME TO THE IX-LAB AND SOS REPAIR SERVICE, TWO WORKSHOPS SPECIALISING IN MAKING, MODIFYING AND REPAIRING LEATHER SUITS.

IX-LAB

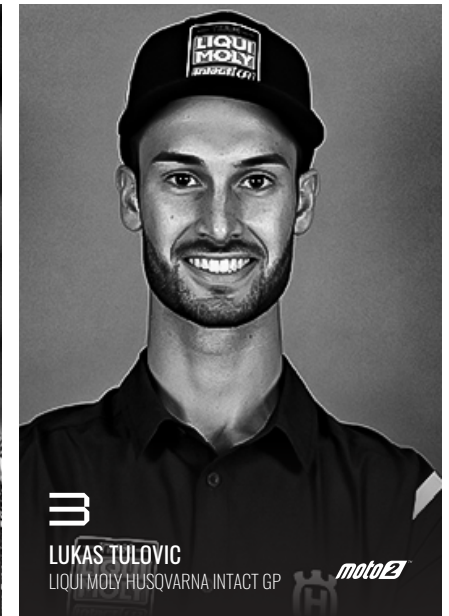

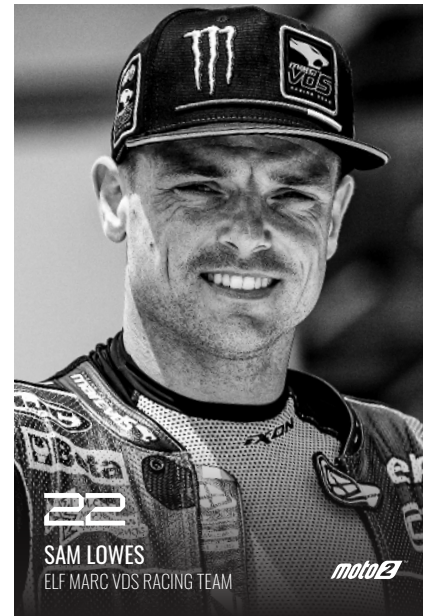

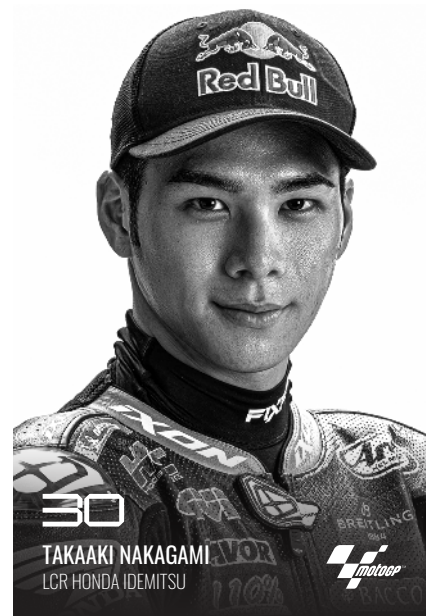

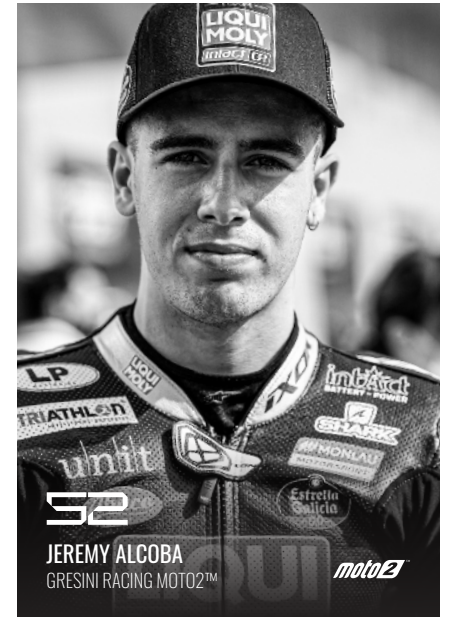

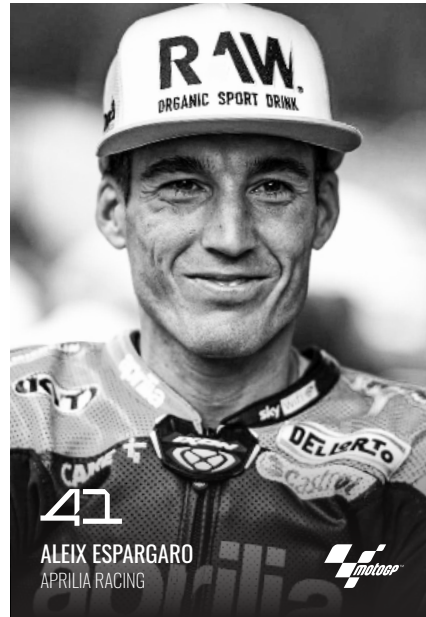

The IX-LAB is our innovation and production laboratory at the IXON HQ in Mâcon: this is where we make all our made-to-measure suits for our professional riders. It's precise and highly technical work. The suits are tailored to each racer's body shape as well as their personal preferences and requirements over the course of the racing calendar. That means every suit the IX-LAB teams make is made on request as a one-off: each suit is a unique piece. The IX-LAB uses its expertise, organisation and versatility to keep the suits up to date: modifications, adjustments and repairs are provided throughout the season with very short turnarounds to give our professional riders the best possible service.

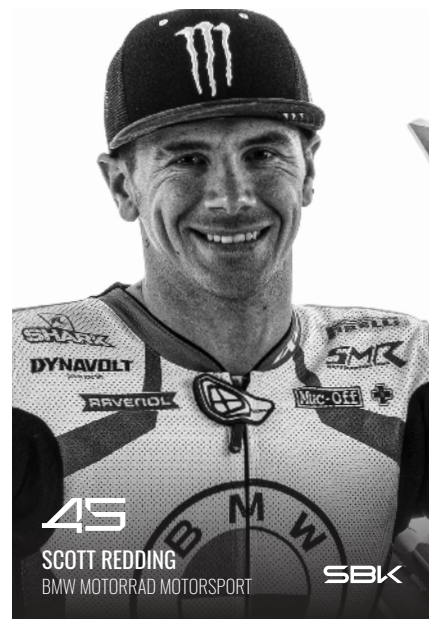

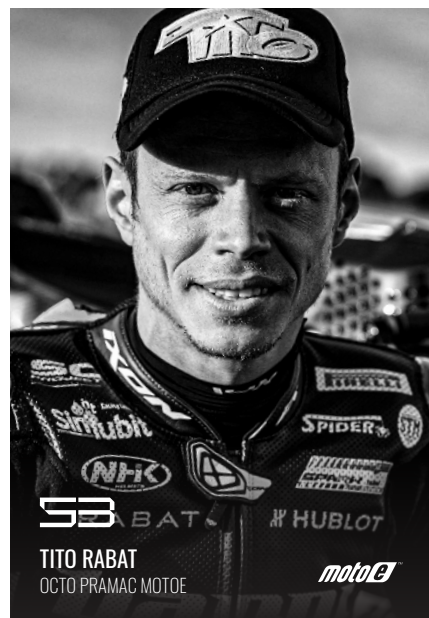

SOS REPAIR SERVICE

As well as the IX-LAB for professional riders, the SOS REPAIR SERVICE is our second workshop based at IXON's head office in France. It provides support to any leather suit owner, whether they're professionals or amateurs and no matter the suit brand. Our SOS REPAIR SERVICE's unique expertise enables it to provide three types of service: customisation and branding, alterations and adjustments, repairs and reconditioning.
